INTRODUCTION

This project is made on Franchise. In this project, we have shown a simple connectivity of PHP and MYSQL. Its objective is to add crew members to our franchise by online method of registering and logging in. This application/website will allow users to enter in our franchise and enjoy our benefits.

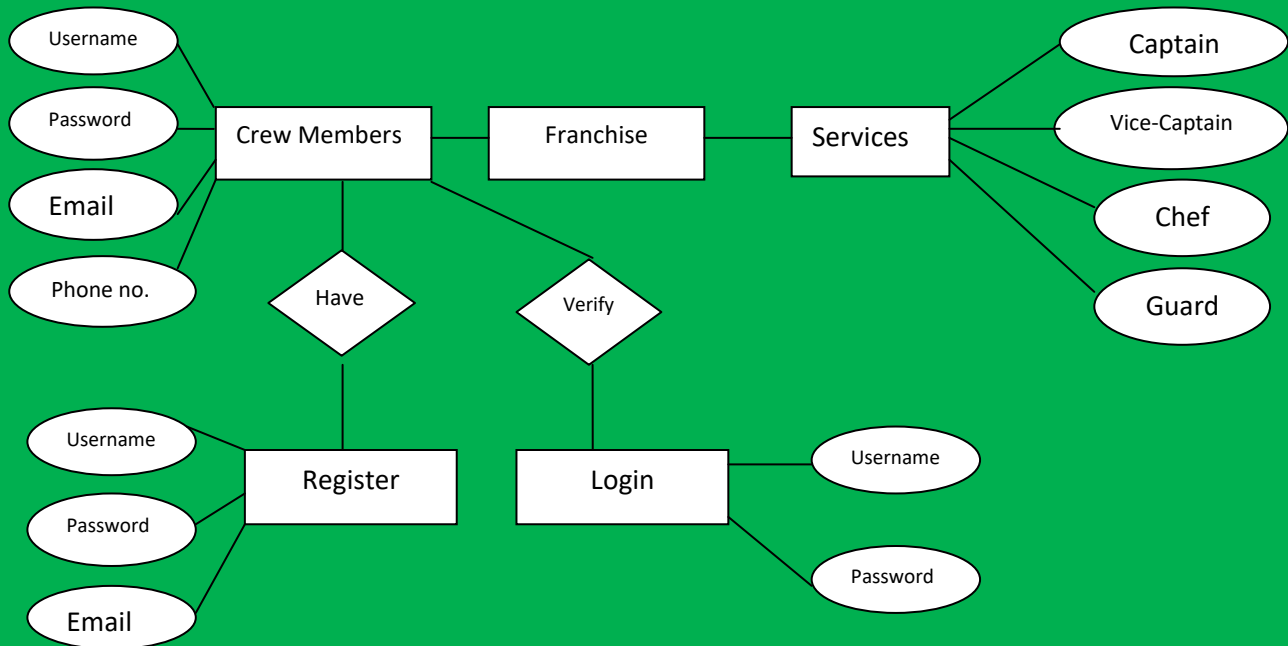

NEED OF PROJECT

This project is made basically to understand and learn the connectivity between PHP and MYSQL. We can learn to enter data from one side and see it on other side.

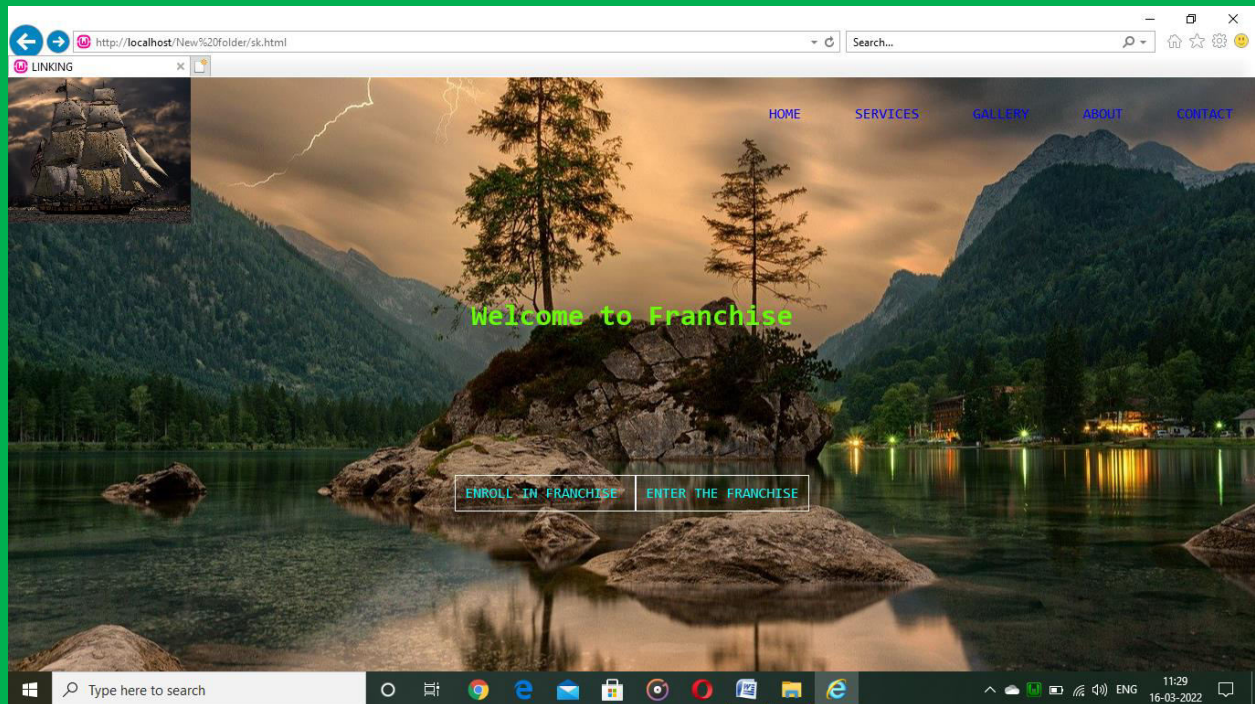

SOFTWARE REQUIREMENTS AND SPECIFICATIONS

- Wamp Server: - We have used Wampserver version 3.2.3 for our project. We used wampserver to run local host where our project will run on browser.
- MySql: - We have used MySql version 8.0.21 where we will create database and tables to save our data.
- Notepad++:- Notepad++ is a coding platform where we have done our all coding including php and MySql.
- HTML:- Hyper Text Mark up Language is used to create webpage where we can display our website easily.
- CSS: - Cascading Styles (CSS) is used to give styling to webpage like colors, fonts, animations etc.
- PHP My Admin: - It is free open source software where we can check and open our databases, project tables etc. Here, our data will be saved from the browser and we can see it anytime.

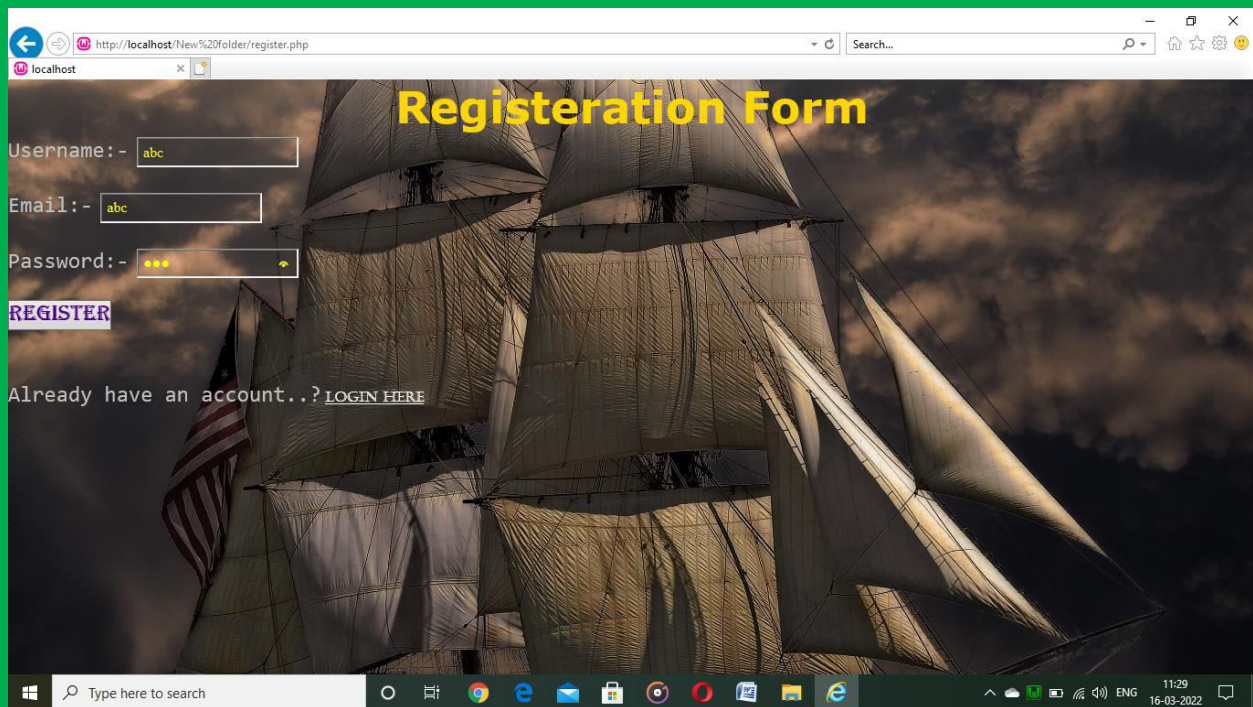

PROJECT DESIGN DIAGRAM

PROJECT DETAILS WITH SNAPSHOTS

When we will open our homepage, firstly we have to register in franchise using “Enroll in Franchise” button and registration form is:

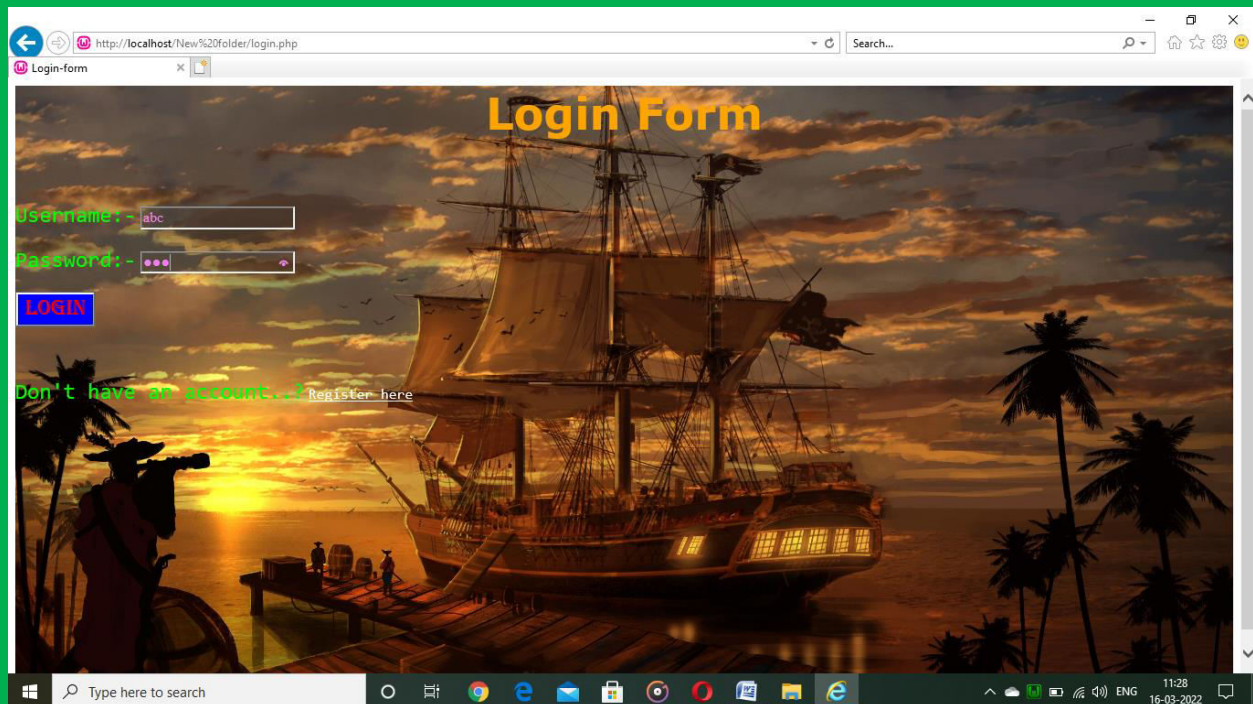

The screenshot shows a web browser window with the URL `http://localhost/New%20folder/register.php`. The page title is "Registration Form". The form contains the following elements:

- Username:
- Email:
- Password:
- A blue button labeled "REGISTER".
- A link: "Already have an account...? [LOGIN HERE](#)".

The background image is a large sailing ship with many sails, set against a cloudy sky.

After successful registration, you will be redirected to Login page where you have to login by same username and password, you entered in registration.

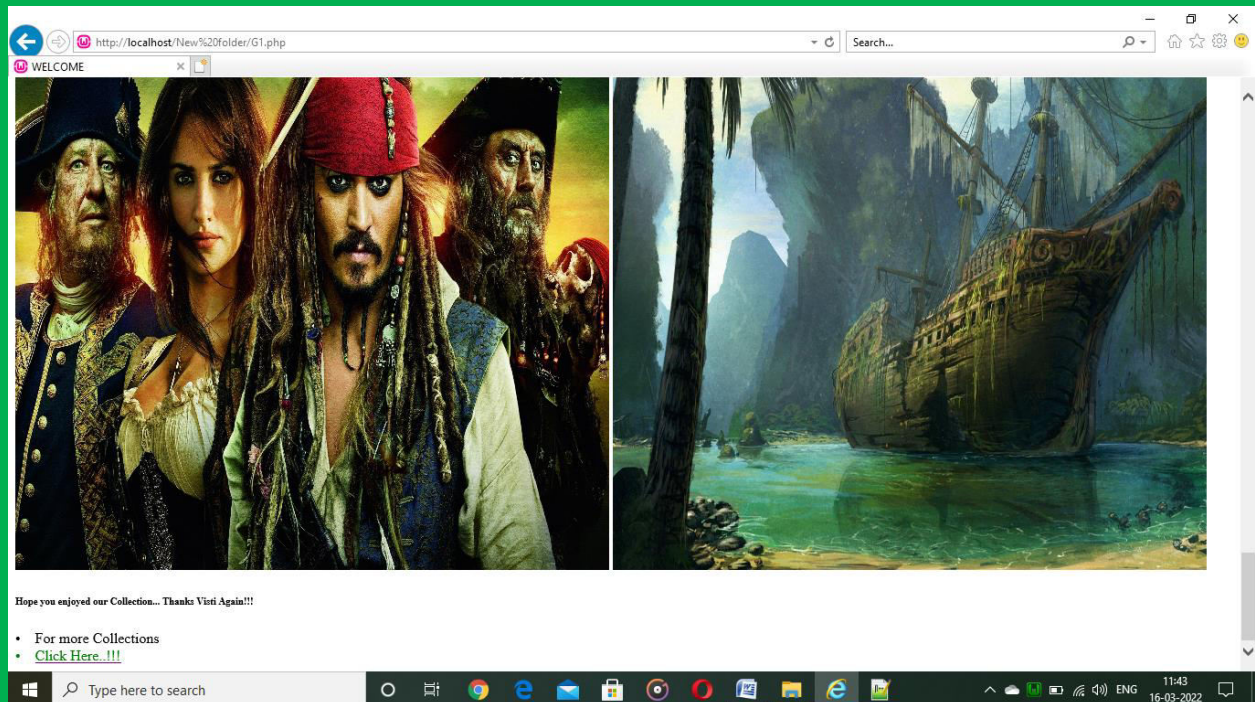

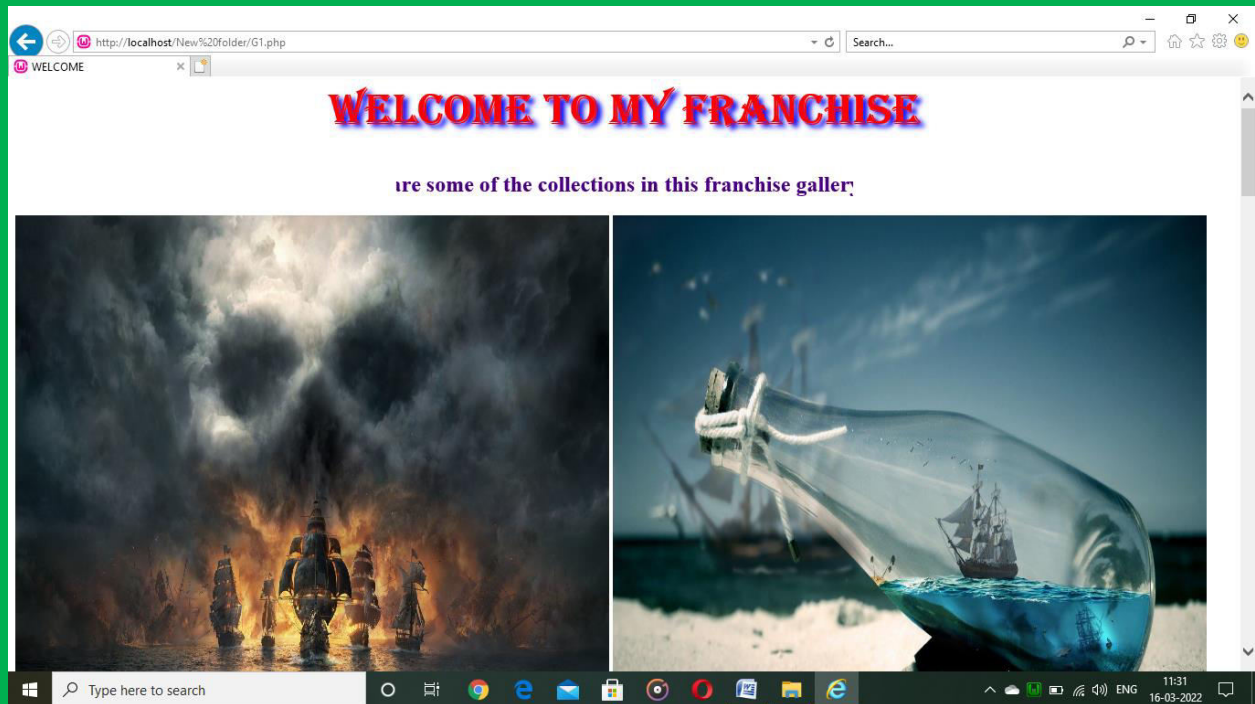

The screenshot shows a web browser window with the URL `http://localhost/New%20folder/login.php`. The page title is "Login Form". The form contains the following elements:

- Username:
- Password:
- A blue button labeled "LOGIN".
- A link: "Don't have an account...? [Register here](#)".

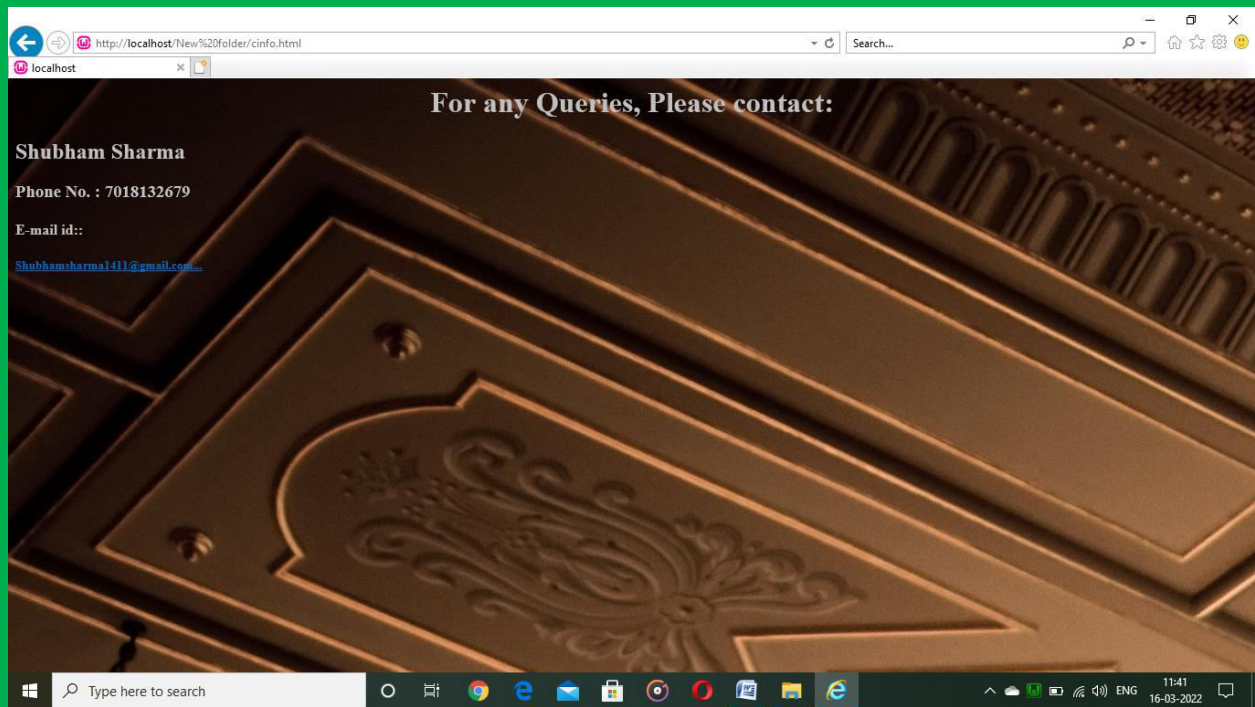

The background image is a sunset scene with a sailing ship, palm trees, and a person in the foreground looking through a telescope.

After successfully login, you will be redirected to our Gallery page as:

So, this is the project of register and login in our franchise.

You can click on Contact Button if you have any queries related project.

CONCLUSION

From this project, we can conclude that we have learnt a lot about main programming languages like PHP, HTML and MySql. This project has a main motive to just understand connectivity and through this website (FRANCHISE), we understood the basic concepts of connectivity between two languages.
